

Hen Parties

Laser Tag is the optimal activity for Hen parties, as it can either be a standalone event, or mixed in as part of a larger day involving multiple events.

As the equipment is electronic and there are no projectiles, it can be played both indoors or outside, and one of bits that is far superior to paintball, is there is no mess, or pain.

Laser Tag is superior in many ways to Paintball in that, it is more accurate, fires over greater distances, allowing more realistic scenarios; the military forces worldwide do not use this without good reason, if it is realism you are looking for this is it.

The Hen will also be pleased as this is a game where the girls excel, often a better shot than the boys
